

WASHING MACHINE BLUES....

Don't Let Washing Machine Hoses Damage Your Home!
As we just found out.....here at Harbor Pointe.....these hoses do indeed wear-out and rupture!

AN OUNCE OF PREVENTION is WORTH A POUND OF CURE!

Are the furnishings, floor coverings and keepsakes in your home worth spending an extra \$20 NOW to prevent a possible flood in your Unit?

That's all it costs to buy a new REINFORCED Washing Machine Hose from a hardware store, like Lowe's or Home Depot. Replacing your WM Hoses is a fairly simple home repair task.....and could prevent thousands of dollars of possible future damage from a busted line.

SO DON'T PUT IT OFF ANY LONGER....pick up a new hose kit and install it immediately. All the Washing Machine lines should be past their warranty and life (as stamped on them – if you check yours) if you have never replaced the hoses since Harbor Pointe was built.
